

Help Save the Honeybees!

Honeybees face unprecedented crisis, and are important for pollination and the security of our food supply. I support a more bee-friendly policy for the five remaining San Mateo County cities that restrict beekeeping – Foster City, Pacifica, San Carlos, Hillsborough and Redwood City. I would like them to follow the example of the rest of San Mateo and San Francisco Counties, which successfully use a nuisance mitigation approach to resolve the occasional complaint. Let's remove the barriers to managing healthy honeybee colonies, which make it hard for beekeepers to improve conditions for bees.
